Frequently Asked Questions

1. What is the Buildathon?

The AgentifAI Buildathon is a structured, **multi-round innovation challenge** designed to enable students to develop enterprise-relevant solutions using Generative AI and Agentic AI technologies. The initiative focuses on **real-world problem statements aligned with industry use cases and business impact.**

2. Who can participate?

You're eligible if:

- You're from an invited college
- You're graduating in **2026 or 2027**
- You register using the official link shared by your college/Capgemini
- Strictly invitation-only and voluntary.

Registrations must be completed via the official registration link shared by the college or Capgemini. Any alternative or unauthorized registration method will be deemed invalid.

Submission of false or misleading information may result in disqualification at any stage.

3. What are the team composition requirements?

Each team must

- Consist of exactly **five (5)** members
- Team members must be from the **2026 or 2027 graduating batch.**
- Teams can be formed in **any combination** across the two batches.
- Teams can **only be formed within the same colleges**.
- Non-compliant teams will be disqualified from participation.
- Each team must designate one official representative for communication.
- Team composition is locked post-registration. Any changes require prior written approval from the organizers.

4. What is the Buildathon structure?

The Buildathon follows a multi-round elimination framework:

- **Pre-Qualification Round**
  - Conducted at the campus level.
  - Evaluation of initial problem understanding and solution approach.
  - Shortlisting of top teams per institution.

- **Round 1 – Elevator pitch.**
  - Evaluation based on clarity, innovation, feasibility, and strategic direction.

- **Round 2 – Technical Deep Dive**
  - Detailed presentation of architecture, LLM workflows, data strategy, agentic capabilities, and prototype.
  - Evaluation of technical depth, enterprise alignment, and execution feasibility.
  - Mentorship support provided for directional clarity (non-technical guidance only).

- **Round 3 – Finale**
  - Final presentation to executive leaders and industry experts.
  - Evaluation across technical excellence, business impact, scalability, and storytelling.

5. How are the Top 10 teams selected?

Selection is based on an aggregated scoring model incorporating:

- Pre-Qualification Round performance
- Round 1 evaluation
- Round 2 evaluation

Assessment parameters include:

- Innovation
- Technical robustness
- Consistency
- Prototype maturity
- Enterprise applicability
- Alignment with GenAI and Agentic AI objectives

The highest scoring ten teams advance to the Grand Finale.

6. What are the rewards?

Finalists	Total Reward (Hospitality experiences worth INR)
Winning Team	3,75,000
1st runner-up	2,50,000
2nd runner-up	1,25,000
Rest of the Finalist Teams	1,75,000
Side Quest	1,80,000
